Apprenticeship Completion- Seek continued employment with your company, pursue higher education, or both!

## Overview

### Higher Education

Post-graduation, apprentices will be able to enroll in higher education courses aligned with their industry pathway.

### Industry Credentials

Apprentices are required to pursue an industry credential to develop practical knowledge and skills.

### On the Job Training

Each apprentice will develop career-ready, in-demand competencies through their employer. These skills are designed to have currency in the job-market, and to set up apprentices for future career success.

\*Apprentices who start their senior year of high school will follow a different timeline than above; to be defined with the apprentice and supervisor

\*\*Apprentices are guaranteed and must be willing to commit the required number of hours, together employer and apprentice may decide to increase work hours
