

Many of us struggle with finding the time and motivation to do self-paced learning. We all need that structured time, support, and motivation to get it done. To help with this, CareerWise has created LevelUp, a structured environment to begin coursework for industry certifications or leveling up your professional skill set.

## OBJECTIVES

- A weekly, year-round class, designed to prepare apprentices for the workplace and provide them the time and resources to receive a certification or credential that is relevant to their occupation.
- Employers opt into one semester at a time
- A custom syllabus will be creating for each apprentice
- Courses and training will be provided through third-party vendors such as Coursera, Udemy, LinkedIn Learning, ToolingU, CompTia etc ...

## INCLUDED IN THIS TRAINING

- + Multiple sessions to accommodate all schedules
- + Self-paced learning
- + Structure, support, and accountability facilitated by CareerWise

## WHAT TO EXPECT

Apprentices meet virtually every week, working asynchronously on assigned coursework. Time spent in LevelUp is paid-time by the employers, so apprentices join sessions during their scheduled work hours.

CareerWise works with supervisors and apprentices to create a customized syllabus consisting of online courses focused on earning a certification or industry specific training most essential to the apprentice's role.

LevelUp is offered year-round to accommodate longer certifications and rotating schedules. Attendance counts towards related instruction hours.

## CERTIFICATIONS CAN INCLUDE

BUT ARE NOT LIMITED TO

- **CompTIA A+, C++, Network+**
- **Certified Associate in Project Management**
- **Quickbooks Certified Bookkeeper**
- **CMfgA**
- **Digital Marketing Pro Certification**
